INTRODUCTION

This report is a profile of labor force and employment characteristics from the 1980 Census of Population and Housing. It is volume IV of a series of Municipal Profiles published by the New Jersey State Data Center (NJSDC). Previous reports showed demographic and housing characteristics from complete count data of the 1980 Census, While this report includes items from the sampel data of long form of the census questionnaire. These tabulations were included on the U. S. Census Bureau's Summary Tape File 3A. This publication was designed and written by Charles Crowley, demographer, NJSDC.

A one-page profile consisting of ten tables is shown for the State of New Jersey, New Jersey counties and minor civil divisions. The first five tables report on the labor force status and employment characteristics of persons the week before completing the census questionnaire, that is, the week before April 1, 1980 for most but not all persons. The last five tables are items on labor force experience in 1979. Explanations of census terms and concepts used in this report can be found in the "Definitions and Concepts" section of this publication.

Additional reports have been published from the 1980 census data by the NJSDC. To obtain census information contact the county planning board board for the geographic area of interest, the New Jersey State Library, or the Newark Public Library. These agencies are members of the NJSDC census data distribution network.

Questions about this report should be addressed to: New Jersey State Data Center, Division of Planning and Research, Department of Labor, CN 388, Trenton, NJ 08625-0388.

A full discussion of the census sample design and all items included on STF3 can be found in the U. S. Bureau of the Census publication, "Census of Population and Housing, 1980, Summary Tape File 3 Technical Documentation".
